HEMANT SHARMA

Game Systems Designer | Gameplay Designer | UI/UX Designer

Bengaluru, Karnataka | Portfolio | LinkedIn | sharmah677@gmail.com | +91 94598 85644

Professional Summary

Game Systems Designer passionate about building engaging gameplay systems, intuitive player experiences, and accessible interfaces. Experienced in gameplay design, systems design, rapid prototyping, balancing, playtesting, UI/UX, and Unity implementation. Strong collaborator who uses user research and iterative design to improve player engagement.

Experience

Assistant Professor — KMCT School of Design, Kozhikode (Jul 2026 – Oct 2026)

- Taught Game Design and Basic Coding courses to undergraduate design students.
- Mentored students on IoT and Arduino-based physical computing projects, from concept to working prototype.

Level Designer & Developer — Leelaland Studios (Apr 2026 – Jun 2026)

- Designed and developed an educational Unity game teaching children to recognize digital scams.
- Owned gameplay systems, progression, feature design, UI, and feedback loops.
- Conducted playtests and usability testing to refine player experience.
- Leveraged AI-assisted rapid prototyping to accelerate development.

Game Systems Designer — Moti (IGDC IP Connect) (Oct 2025)

- Designed gameplay systems, progression, game economy, and core loop for a 3D cozy exploration game.
- Delivered a polished vertical slice with a three-person team in one week.
- Presented the project to industry mentors and investors during IGDC.

Projects

- ScamShield: Educational Unity game focused on scam awareness through interactive scenarios.
- Moti: Cozy exploration game inspired by Indian street dogs with systems-driven progression.
- DP2 – AR MotorPlay: AR therapy game using ML-based pose recognition and accessible interaction design.

Education

- M.Des. in Digital Game Design — National Institute of Design (2024–Present)
- BS-MS Dual Degree in Biological Sciences — IISER Mohali (2017–2023)

Achievements

- Runner-up – Krafton Challenge, i_hack IIT Bombay (2025)
- India Gaming Show (IGS 2025), New Delhi (Feb 2025) — Showcased my game at the IGS Exhibition.
- India Game Developers Conference 2024 (IGDC), Hyderabad (Nov 2024) — My game was showcased by an indie game group.
- IGDC IP Connect Showcase

Skills

Game Design: Gameplay Design • Systems Design • Feature Design • Core Loops • Progression • Game Economy • Mechanics Design • Level Design • Balancing • Playtesting • Player Psychology • Player Retention

UI/UX: User Research • Interaction Design • Wireframing • Prototyping • Accessibility • Information Architecture

Development: Unity • C# • Git • Agile • Rapid Prototyping • Cross-functional Collaboration

Creative: Figma • Blender • Maya • Photoshop • Illustrator • ZBrush • Procreate

AI: ChatGPT • Claude • Midjourney • AI-assisted Design Workflows
